SUMMARY

Results-oriented software engineer with a background in engineering and professional training in full-stack development. Experienced in building scalable applications using Java, Spring Boot, JavaScript and SQL. Combines technical proficiency with strong leadership and problem-solving skills honed through management experience, focused on delivering impactful software solutions.

SKILLS

Languages	Java, JavaScript (ES6+), HTML5, CSS3, SQL, Python
Frameworks / Libraries	Spring Boot, Node.js, Express, Javalin, React, Bootstrap, jQuery
Tools / Methods	Git, GitHub, OOP, Data Structures and Algorithms, JDBC, Agile, REST APIs, Postman

EDUCATION

B.S. Computer Science, Software Engineering · Southern New Hampshire University — Expected Mar 2027

Associate Degree in Science (Engineering) · Mesa Community College, Mesa, AZ — 2025

Key courses: Web Development, JavaScript, Java Programming, Data Structures and Algorithms. Also: Full Stack Web Development (Udemy).

EXPERIENCE

Java Intern · Revature, Remote — Aug 2024 – Jan 2025

- **Full-stack development:** completed an intensive back-end program focused on Java, SQL and RESTful API construction.
- **Test-driven development:** implemented functional APIs using TDD, ensuring reliability with JUnit and Mockito.
- **Algorithmic problem solving:** completed 108 coding activities and 14 technical evaluations using Java APIs.
- **Technical stack:** Maven for dependency management, Logback for logging and Git for version control.

Assistant Manager · YC's BBQ Grill, Scottsdale, AZ — Oct 2022 – Jan 2024

- **Leadership and operations:** ran daily operations and inventory in a high-volume environment with 100% compliance on quality and safety standards.
- **Problem solving:** resolved operational bottlenecks and adjusted scheduling to keep the business running during peak hours.
- **Quality control:** monitored production standards and mentored staff to meet company performance benchmarks.

Math Tutor · Mesa Community College, Mesa, AZ — Jan 2017 – Mar 2020

- **Technical communication:** translated complex mathematical and logic-based concepts into clear instruction for diverse student groups, from College Algebra to Calculus.
- **Problem decomposition:** guided students through multi-step engineering and math problems to find core logic errors.
- **Adaptive mentorship:** identified knowledge gaps and built customized practice resources.

PROJECTS

Spring Social Media Blog API · Spring Boot, Spring Data JPA, Spring Web

- Engineered a backend API managing user authentication (registration and login) and CRUD operations for messages.
- Migrated the architecture to the Spring Framework for dependency injection and automated persistence with Spring Data JPA.

Portfolio Website · HTML, CSS, JavaScript

- Designed and deployed a responsive personal portfolio with a data-driven project grid, light and dark themes and accessible navigation.
- Deployed with GitHub Pages for continuous deployment and version control.
